SKILLS

- Python
- JavaScript
- Linux
- Shell Script
- Node.js
- React
- PostgreSQL
- Git

PROJECTS

GitHub Virtual Pets Habit App
gitpets.herokuapp.com

- A Node Express web app running on Heroku. Displays the pet's stats dynamically using GraphQl and Octokit.
- Users can embed the pet graphic on their GitHub profile's readme to display their pet to others.
- Unit and integration testing done with Superagent.

YouTube Data Migration Web App
yt-data-migrator.herokuapp.com

- A Python Flask app running on Heroku. Successfully migrates over 100 YouTube items within seconds, using the YouTube Data API, OAuth 2.0, and SQLAlchemy.
- Achieves a familiar design consistent with YouTube by implementing Material Design web components and design principles.

Linux Home VPN Server
paigevenuto.com/articles/vpn

- A personal CentOS OpenVPN server for TLS and SSH during travel. Made using ddclient for dynamic DNS, and EasyRSA for encryption.

CERTIFICATIONS

CompTIA Security+	CompTIA Network+	CompTIA A+	GED
